***Election/Restrictions***

1. This application is in condition for allowance except for the presence of claims 16-31 to an invention non-elected. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

2. Newly submitted claims 16-31 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claims 16-31 defines methods and apparatus for determining relationships between the first and second film processes in which a parameter of the first film process has been changed, and the difference in the Cpk values of the two processes is used to optimize the process. The originally presented invention discloses the method for calculating film build average thickness from data selected from the selected subgroups on which a single film build process has been performed.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for

Art Unit: 2863

prosecution on the merits. Accordingly, claims 16-31 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Allowable Subject Matter***

3. Claims 1-15 are allowable over prior art of record.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6,484,121.

('121) discloses that the color of the circles 65 in the layout image not only depends on the film thickness measurements values but also depends on the display ranges "MIN 66" and "MAX 68" and chooses color based on value, col. 6, lines 13-32.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire ONE MONTH from the mailing date of this action.
